

Charm EZ[®] System

Combined Incubator and Reader in One

Superior Science

- Testing with Combined Incubator/Reader Analyzes ROSA® antibiotic or Aflatoxin M1 test strip automatically once the incubation is complete
- **Read-only Mode for Sample Batching** External incubation with multiple ROSA quad incubators for high volume users
- **Touch-Screen** Streamlines operation by giving the user the ability to quickly enter information
- **Printable or Downloadable Results** Backs up 8000 test results to internal memory, and the SD card stores over 100,000 test results
 - Transmits results to a PC using a standard USB cable, or to a LIMS network over Ethernet
- Charm EZ® Export Software Exports test results to Excel for analysis
- **Sample ID** Recognizes sample ID input through the touch screen, an external keypad, an RFID, or a bar code reader

Automate Antibiotic and Aflatoxin M1 Testing in Milk

The Charm EZ system instantly identifies test strip color and automatically adjusts incubation time, temperature, and test calibration to match.

Instrument Overview

Self Diagnostics

Chooses Correct Operation Automatically

Based on the ROSA test strip color, the Charm EZ system automatically enters the correct incubation time, temperature, and channel for the operator.

During incubation, the Charm EZ system performs selfdiagnostics and will prompt the operator if errors occur. Charmez Test has previously been run (lines detected). Run another strip.

Checks Optics

An optics check identifies previously run strips and when the lens needs cleaning.

Checks Sample Volume If the sample flow is

incorrect (e.g., the wrong

volume of milk is added), the

Charm EZ system prompts the operator to start over.

The Charm EZ system reads "red" as:

- Incubation time = 30 seconds
- Temperature = 56 °C
- Channel = BL30SEC

*Fixed volume pipettes (300 $\mu L)$ can be ordered from Charm.

Maximize your Investment

One Instrument, Multiple Tests^A:

The Charm EZ system's unprecedented versatility allows for a variety of different antibiotic tests to be run with a single instrument.

Beta-lactam		QUADS						
BL30SEC	Beta-lactam, 30-seconds		Beta-lactam, Tetracycline, Streptomycin and

Quality and Efficient Results

The quality of your products, efficiency of production, and success of your business all depend on continuous optimization and automation of your production process. Charm CONNECT and Charm SMART allow for seamless integration between multiple units and plant/sites to a database allowing corporate reports/analytics, open source code, and more.
